Penetrating injury in athlete

Actor (Jamee) information

You are a 26 year old female with a history of juvenile onset diabetes, which is generally well controlled. You are also a professional tennis player. Today, you were playing a match when you trod on a sharp object. The object penetrated the base of your shoe and the sole of your foot. You are in moderate pain, and are unable to weight bear on the foot.

You are to be seen by a consultant, who will take a brief history from you and advise on management.

Prompts:

- Do I need antibiotics for this wound?
- What pain medications can I take that are approved by the Sports Authority?

Marking:

	Mark
High risk for pseudomonas + diabetic foot – tazocin IV needed	2
Recognises some medications are banned for professional athletes	2
Takes focussed history from patient	1
Orders appropriate tests	2
Asks about tetanus status	1
Offers appropriate analgesia/STI management methods	1
Asks about HbA1c levels/diabetic control	1
