Actor (RMO) information

You have approached your consultant on a non-clinical day to ask about how to assess red eye in Emergency. You have a few photos of red eye conditions you have seen recently in ED.

Prompts:

- Can you give me an algorithm for assessment of acute red eye?
- What risk factors should I ask for?
- What is your approach to red eye assessment?

Marking:

***PROPS: viral conjunctivitis, bacterial conjunctivitis, blepharitis, periorbital cellulitis

	Mark
Structured approach to assessment of red eye	2
Describes at least three common diagnosis	2
Able to state risk factors that must be asked for (trauma, diabetes, etc)	1
Gives advice on where to find further information*	1
Correctly identifies red-eye diagnoses on props	2
Teaching style – clear, concise, organised	1
Manner to RMO	1

* Eye Emergency Manual: an illustrated guide.
